

Lizz Bartos

UI/UX Technical Program Manager • Bellevue, WA
lizz.bartos@gmail.com • linkedin.com/in/lizzbartos

I am an organized and detail-oriented technical program manager experienced in collaborating with multidisciplinary teams to define and deliver a product vision. I most enjoy developing consumer-facing web-based applications to delight end-users. I am passionate about all aspects of the user experience, especially the usability and accessibility of interfaces.

RECENT WORK EXPERIENCE

Robot Sea Monster, Remote

Producer

2/2017 - Present

- Managing a diverse distributed production team, including creating, documenting, and reviewing project tasks; running standups; enforcing high quality of deliveries
- Identifying, monitoring, and reporting risks, budgets, and schedules to internal and external stakeholders
- Taking on ad hoc responsibilities, including recruiting, implementing process improvements and workarounds, and contributing to production plans and sales proposals

Williams Learning Solutions, Remote

Technical Project Manager

9/2016 - 1/2017

- Developed game concept, content, design, and gameplay in collaboration with startup team members
- Created initial wireframes detailing user interface and experience for an educational STEM mobile game
- Researched and recommended project management tools, systems, and workflows to fit company culture

Expedia, Bellevue, WA

Application Engineer (Engineering Marketing)

3/2015 - 8/2016

- Designed user experience and user interface, and developed front-end components for a new email marketing ecosystem application using Angular.JS and Node.JS
- Proposed workflow improvements and tools to streamline communication with internal teams, reduce dependencies and handoffs, and automate processes to minimize manual efforts
- Led team in migrating and optimizing hundreds of multilingual email contents that reach millions of weekly subscribers; reduced files by up to 75% to improve maintainability
